These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more.

CRAWLING AND INDEXING

PWA

INSTALLABLE

Web app manifest and service worker meet the installability requirements

PWA OPTIMIZED

Does not register a service worker that controls page and start_url

Configured for a custom splash screen

Sets a theme color for the address bar.

Content is not sized correctly for the viewport

The viewport size of 366px does not match the window size of 360px.

Has a <meta name="viewport"> tag with width or initial-scale

Provides a valid apple-touch-icon

ADDITIONAL ITEMS TO MANUALLY CHECK (3)

Manifest doesn't have a maskable icon

Show

These checks are required by the baseline <u>PWA Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
